Focus on high quality properties

Initial due-diligence and robust ongoing loan monitoring

Large number of small loans for diversification

Geographically diverse portfolio

Senior underwriting staff and credit committee

Residential loans

*Past Performance does not guarantee future results. Northern Alliance Trust locks in its Unit price to \$5.00/Unit. The actual net asset value (NAV) typically fluctuates between \$4.85 and \$5.10 depending on the performance of the fund, current expenses, transaction costs and potential losses. Some expenses are large annual expenses (audits, OM revision) which can be recovered throughout the remainder of the year. The return calculated on this summary does not reflect the NAV fluctuations. B Unit Distribution performance is different from the total fund performance. Returns are compounded quarterly and annualized. Quarterly return (non-adjusted) for Q4 2025 was \$0.1089/unit. * December 2016, distribution was not issued.
